“Want Fries With That?”

Welcome!

Welcome!

Hello and welcome to the “**Want Fries With That?**”

This quick read blueprint will teach you one thing, and one thing only...

- How to create an easy eCom page in Wordpress
- How to create a simple Paypal button so people can buy
- How to then a “**do you add fries to that**” page (aka upsell) for an impulse buy.
- How to create a Thank You page

*(NOTE! This Blueprint will show you how to do it all manually... if you want a great drag/drop solution check out <http://askblings.com/just2> - use coupon **barbtall** to drop price big!)*

Ready for the adventure?

Alrighty then, move now to:

Before You Begin

Before You Begin

First things first. You need to have something to sell, of course.

So, you can go to the Dollar Store or Walmart or source directly from Aliexpress.

Make sure you get 2 products:

- Something inexpensive
- Something that costs a bit more

Here's some resources for that:

- <https://www.cnbc.com/2017/11/02/28-year-olds-company-makes-millions-selling-walmart-buys-on-amazon.html>
- https://www.reddit.com/r/Flipping/comments/81by2e/retail_arbitrage_clearance_items/
- <https://www.repricerexpress.com/a-guide-to-retail-arbitrage-on-amazon/>

Before You Begin

- <https://theworkathomewife.com/retail-arbitrage/>
- <https://firedrillpodcast.com/ebay-amazon-ecommerce-brianna-moller-greene/>

And did you know there are apps that help you price-check across the Internet?

- <https://www.oberlo.com/blog/25-best-price-comparison-websites>
- <https://mashtips.com/iphone-shopping-apps-to-scan-and-compare-prices/>

You can also create print on demand products as well! Check out these resources to help:

- <https://theabundantartist.com/ultimate-guide-print-on-demand/>
- <http://blog.gearlaunch.com/how-to-find-and-design-popular-print-on-demand-products>
- <https://www.oberlo.com/blog/print-demand-vs-aliexpress-dropshipping>

Got that? Alrighty then, move now to:

“Want Fries With That?”

Step 1.) Create eCom Page For Item

Step 1.) Create eCom Page For Item

So!

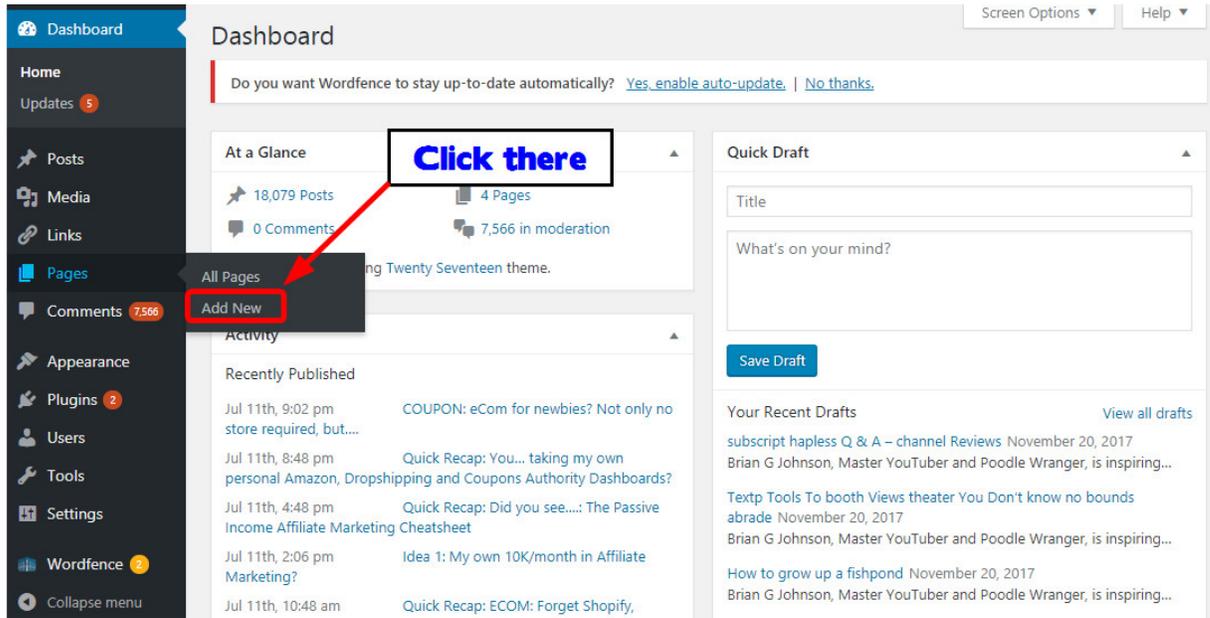

Go to your Wordpress blog. If you don't yet have a Wordpress Blog, you can create a free one over at:

- <http://wordpress.com>

I will be using my own site, <http://dailywsos.com> for our example (it has the default WP theme activated).

Next, click on “Add new page:”

Step 1.) Create eCom Page For Item

This will be where you will enter in the details for your eCom page.

You should include:

- Great call to action
- Copy that shows how much people are saving

Here’s an example I just dashed up:

Step 1.) Create eCom Page For Item

Great Necklace

Next, let's create the upsell page so you can let buyers buy a “want fries with that?” impulse buy.

Move now to:

“Want Fries With That?”

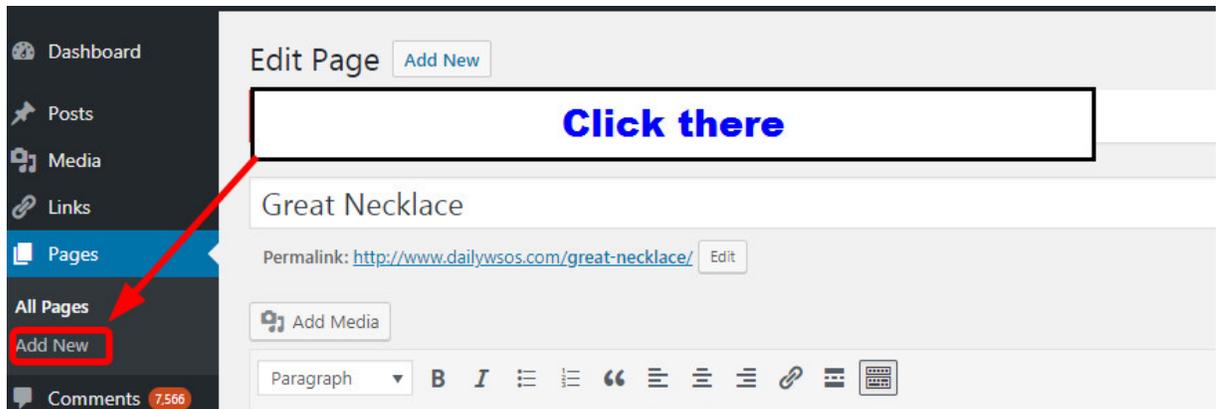

Step 2.) Create “Want Fries With That?” Page and Add 2nd Paypal Button

Step 2.) Create “Want Fries With That?” Page and Add 2nd Paypal Button

Now, you’re going to create the upsell page like so:

Click “Add New:

And then name the page something like “Great Upgrade!” and add in the images:

“Want Fries With That?”

Step 2.) Create “Want Fries With That?” Page and Add 2nd Paypal Button

The upsell page now looks like:

GREAT UPGRADE!

Let's now recap.

You have a sales page for you inexpensive main item.

You have a sales page for your upsell item.

Now it's time to create Paypal Buy buttons!

Move now to:

Step 3.) Create Paypal Buttons So People Can Buy Them

Step 3.) Create Paypal Buttons So People Can Buy Them

It's time to create the Paypal buttons!

Log into your Paypal account over at:

- <http://paypal.com>

Paypal has a great how-to for that over at

- <https://www.paypal.com/us/smarthelp/article/how-do-i-add-a-paypal-payment-button-to-my-website-faq3629>

ie:

1. Visit <https://www.paypal.com/merchant/education>
2. Click **PayPal buttons**, and then click **Create New Button**.
3. Select a button type to create. The "Buy Now" button is a great choice if you sell only one or a few items on your site. If you sell multiple items on your site, choose the "Shopping Cart" button to let your customers add an item to their shopping cart.
4. Enter the item name and price. You can also customize the button with additional features. Click **Create Button**.
5. Click **Select Code** to select the button code.
6. Copy and paste the button code in to your own web page code.

Step 3.) Create Paypal Buttons So People Can Buy Them

7. This new button will appear on the "My Saved Buttons" page if you'd like to edit it at any point.

You can always edit your button. Click [here](#) to see how.

Tip:

- If you'd like to allow your customer to provide feedback, create a 'Text Entry' field and name it. This field will appear above your button.
- The 'Email URL' option is only available if you are not using any drop down menus, text boxes or user selections. If these selections have been made you will be required to use the HTML code to create your button. We cannot send a URL with these options.

Let's see how that actually works.

The 'Create Paypal Buttons' every now and then seems to hide.

So, visit:

1. <https://www.paypal.com/merchant/education>

And click on:

2. [Manage PayPal buttons](#)

We automatically save buttons you create when you're logged in. Here, you can change most button characteristics, view the HTML code, or create new buttons that are similar to existing ones. However, you may not be able to change fields if you've created them using an API.

Now, this part is critical. Click on:

Step 3: Customize advanced features (optional)

Notice the Paypal Step 3?

You can redirect the buyer to your upsell page!

Step 3.) Create Paypal Buttons So People Can Buy Them

▼ Step 3: Customize advanced features (optional)

Customize checkout pages

If you are an advanced user, you can customize checkout pages for your customers, streamline checkout, and more in this section.

Can your customer add special instructions in a message to you?

Yes
Name of message box (40-character limit)

 No

Do you need your customer's shipping address?

Yes
 No

Take customers to this URL when they cancel their checkout

Example: <https://www.mystore.com/cancel>

Take customers to this URL when they finish checkout

Example: <https://www.mystore.com/success>

Put the URL to your Upsell here

Your upsell page will be found on Step 2 earlier in this chapter.

Thus, put the URL into the text field for:

6. Take customers to this URL when they finish checkout

When you're done, you'll be directed to a page that lets you add the HTML code to your Wordpress site:

Step 3.) Create Paypal Buttons So People Can Buy Them

Add your button code to your webpage

You just created customized HTML code for your button. The final step is to copy the code from this page and paste it into your website editor.

Copy the button code:

1. Click **Select Code**.
2. Right-click and copy the selected code.

If you're working with a website developer, you can paste the button code into an email and send it to your developer now.

Paste the button code in your website editor:

The code must be pasted in the "code" view, where you can view and edit HTML.

1. In your website editor or admin page, open the page where you want to add your button.
2. Look for an option to view or edit HTML.
3. Find the section of the page where you want your button to appear.
4. Right-click and paste your button code into the HTML.
5. Save and publish the page. (The preview function in your editor may not display the button code correctly.)
6. Test the button to make sure it links to a PayPal payment page.

fashion, you can check out WP plugins like those found at:

- <https://wordpress.org/plugins/search/paypal/>
- <https://www.wpbeginner.com/plugins/10-wordpress-paypal-plugins-for-easily-accepting-payments/>

Alrighty now... let's see where we are.

You've gained resources for sourcing items to sell.

You've learned how to make the sales pages (one for the low-cost product, and one for the “want fries with that” product).

You've learned how to create Paypal buttons for both pages.

You've learned how to set the upsell page as the “Take my customers to this URL” after the first Paypal checkout.

What's left?

Well then!

You can create a “Thank You” page.... But not just ANY thank you page....

A thank you page that makes you money!

Move now to:

Step 4.) Create and Monetize A Thank You page

Step 4.) Create and Monetize A Thank You page

Put yourself now in your customer’s shoes.

Your customer has just bought EITHER one or both of your items.

Let’s assume your customer bought BOTH items.

You can create a “Thank You” page in Wordpress where your customer is redirected after the second purchase (aka you would put this URL in the textfield for **Take customers to this URL when they finish checkout**).

Here’s how.

First, ask yourself.

What should even BE on a thank you page?

Well, first of course, you should thank your customer for buying and write a bit about how/when/where they can expect their package(s) to arrive.

But!

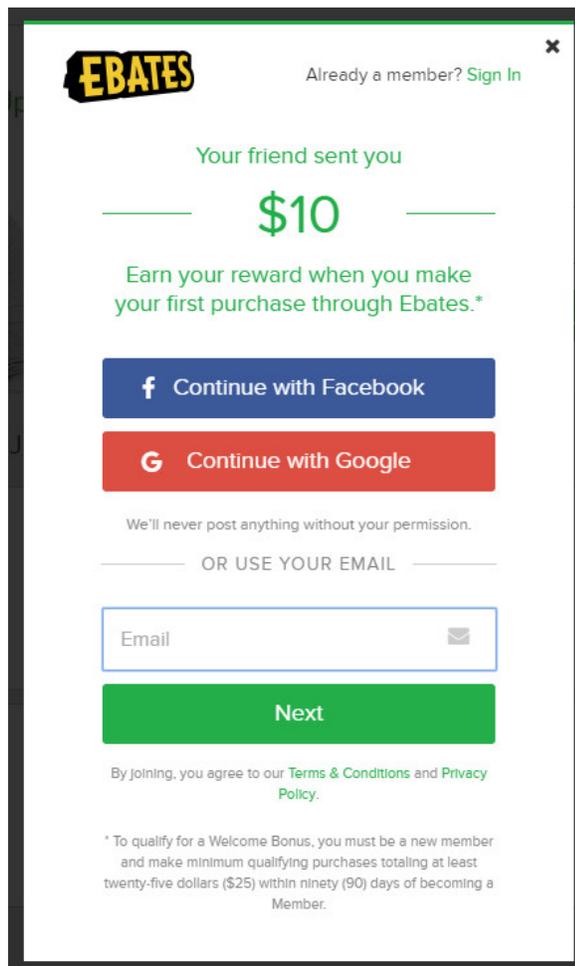

You can ALSO add affiliate links to your Thank You page too...

“Want Fries With That?”

Step 4.) Create and Monetize A Thank You page

And if your customer buys anything FROM your affiliate link on your page... well, you'll get the credit/commissions!

Since you're focusing on eCommerce here, you could add affiliate links for shopping goodies, like, say, **eBates** over at <http://askbling.com/ebates> (gives cash/rewards back):

Anywhos, let's get back to the actual creation of your Thank you page.

Log into your Wordpress site, and click "Add New" (like you did to create the first 2 sales pages).

Name your page "Thank You".

Step 4.) Create and Monetize A Thank You page

And then write in some useful copy, like:

“Thank you for ordering! You should receive your package in 3-5 business days. Do feel free to contact me at <your contact info> if you have any questions.”

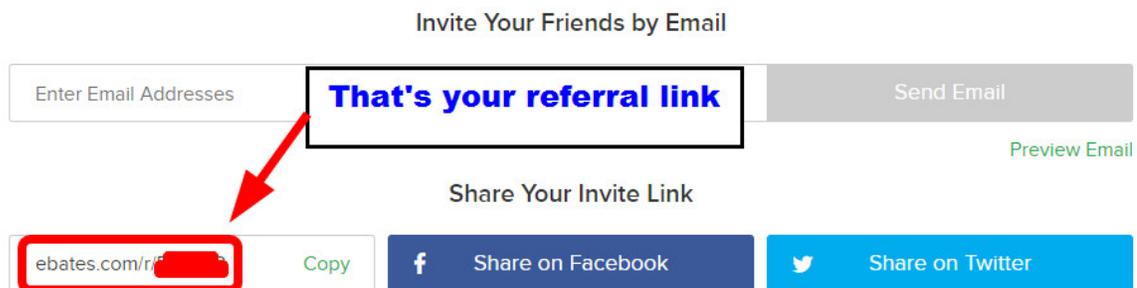

So far so good!

Next, visit **eBates** over at <http://askbling.com/ebates> .

Sign up.

Then visit <http://askbling.com/ebatesrefer> .

Grab your referral link:

Go back to editing your Thank You page, and add:

“And while you’re waiting, if you’d like to get great deals and cash back on all sorts of goodies, visit eBates.com (it’s free!)”

Your final Thank You page might look something like:

Step 4.) Create and Monetize A Thank You page

THANK YOU

Edit

“Thank you for ordering! You should receive your package in 3-5 business days. Do feel free to contact me at <your contact info> if you have any questions.

“And while you’re waiting, if you’d like to get great deals and cash back on all sorts of goodies, visit eBates.com (it’s free!)”

Yep, that’s pretty lonely-looking, but you get the idea. You can always visit royalty-free sites like:

- <http://pixabay.com>
- <http://pexels.com>

to get free images like:

- <https://pixabay.com/en/thank-you-thanks-card-message-note-515514/>

You can then add that image to your thank you page by first saving the image to your desktop, and then by clicking “Add Media” and inserting the image.

Your page might look like:

Step 4.) Create and Monetize A Thank You page

THANK YOU

Edit

Thank you for ordering! You should receive your package in 3-5 business days. Do feel free to contact me at <your contact info> if you have any questions.

“And while you’re waiting, if you’d like to get great deals and cash back on all sorts of goodies, visit [eBates.com](https://www.eBates.com) (it’s free!)”

Need help in inserting images into Wordpress? Check out:

- <https://en.support.wordpress.com/images/adding-images-to-posts-or-pages/>
- <https://www.wpmadesimple.org/guides/adding-images/>

Neat! Once your Thank You page looks the way you want, grab the URL to that and add it to your Second Paypal button (so your customers are redirected to it).

We’re almost done!

Let’s revisit for a second... and think on where you are now.

You’ve gained resources for sourcing items to sell.

You’ve learned how to make the sales pages (one for the low-cost product, and one for the “want fries with that” product).

Step 4.) Create and Monetize A Thank You page

You’ve learned how to create Paypal buttons for both pages.

You’ve learned how to set the upsell page as the “Take my customers to this URL” after the first Paypal checkout.

You’ve created a Thank You page and updated your second Paypal button to return customers to it.

But now an opportunity for grey hairs arises!

What if your buyer decides NOT to purchase the “Want Fries With That” Item?

They’re kinda sorta stuck on that second sales page, and would never see your monetized Thank You Page!

Not to fear.

You can simply add a “No Thanks” link to the “want fries with that” sales page... and hyperlink it to your Thank you page.

Here’s how.

Go back to your Wordpress site and edit the “want fries with that” sales page.

Below your Paypal button, add the words “No thank you” and hyperlink it to your Thank you page.

The final result should look something like:

“Want Fries With That?”

Step 4.) Create and Monetize A Thank You page

WAIT! Special ONE TIME ONLY Offer!

[No thank you](#)

There's the "No thanks" link that will take your customers to the Thank you page.

Isn't that cool?

This way, if your customer buys the “Want fries with that” upgrade,

Step 4.) Create and Monetize A Thank You page

Paypal will return them to your Thank You page...

And if they do NOT want to purchase it...

They can go directly TO your Thank you page....

... get their final information....

And even see your affiliate link to eBates.

Woot!

What You Have Just Learned

What You Have Just Learned

Copyright © 1998

You have just learned how to dip your toes into eCom via a simple 2 product sales funnel:

- Your first low-cost item
- Your “Want Fries with That?” upsell
- How to add Paypal buttons to both
- How to add redirects to those button so your customers end up on the right pages
- How to create and monetize a Thank you page.

But you’re not done yet – now, it’s time for:

Your Next Steps

Your Next Steps

Your next steps are to DO!

Decide what products you want to sell.

Create the 2 sales pages and the Thank You page in your Wordpress site.

Create the 2 Buy Buttons in Paypal.

In the first Buy Button, redirect your customer to your “Want Fries with That?” page.

In the second Buy Button, redirect your customer to your Thank You page.

Make sure you have a direct link to your Thank You page on your “Want Fries with That?” page (in case people do NOT want your second upsell).

And then rinse and repeat!

Oh, and one last thing...

“Want Fries With That?”

Your Next Steps

What’s you’ve just read is exactly how to do this cool eCom strategy by yourself.

Did you know software exists that makes it easy beyond belief?

It’s called [Instant eCom Funnels](#):
